EDUCATION

VIT-AP University

2022 – 2026

B.Tech, Computer Science & Engineering (CGPA: 7.54/10)

- Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Backend & APIs: FastAPI, REST API design, RESTful services

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MySQL, MongoDB

AI/ML: TensorFlow, Scikit-learn, CNN, YOLOv3, NLP, OpenCV, LLM fundamentals

Tools & DevOps: Git, GitHub, CI/CD, Linux, Vercel, Render, pytest

EXPERIENCE

Python Full Stack Development Intern

July 2026 – Present

TAP Academy

Bengaluru, India

- Developing web applications using **Python, Django, HTML, CSS, JavaScript, and SQL**.
- Implementing **CRUD operations, Django models, views, templates, and database connectivity**.
- Building and integrating frontend and backend components for full-stack applications.
- Using **Git and GitHub** for version control and project development.

PROJECTS

Food Quality Detection Web App (Hero Project) | *React, FastAPI, YOLOv3, CNN*

- Designed and built a full-stack, low-latency web application serving real-time food detection and freshness classification predictions to users via a REST API layer connecting a React frontend to a deep-learning backend.
- Trained and evaluated YOLOv3 and CNN models on a dataset of 2,000+ images, iterating on architecture choices to improve classification accuracy.
- Built a responsive, cross-device UI with live prediction visualization to keep end-to-end latency low and the experience smooth on both desktop and mobile.

AI-Powered Event Manager Application | *React.js, FastAPI, Scikit-learn, NLP*

- Built a full-stack platform to streamline event planning, including ML models for event-success prediction and a personalized recommendation engine driven by user behavior analysis.
- Implemented NLP-based sentiment analysis on participant feedback to surface actionable insights, and integrated an LLM API to provide intelligent in-app assistance.
- Wrote unit tests with pytest across FastAPI endpoints to catch regressions early and improve backend reliability.

Chronic Kidney Disease Prediction System | *Python, React, FastAPI, MongoDB, Deep Learning*

- GitHub | Live Demo
- Developed a full-stack healthcare application for early CKD risk prediction, implementing and benchmarking RNN, LSTM, GRU, and GRU-D models on clinical time-series data.
- Built a data preprocessing pipeline handling missing values and feature normalization across multiple patient health parameters, and an interactive dashboard for real-time risk monitoring.
- Evaluated models using accuracy, precision, recall, F1-score, and confusion matrices to select the best-performing architecture.

PrestaShop E-Commerce Deployment | *AWS EC2, PrestaShop*

- Deployed and configured a scalable e-commerce platform on AWS EC2, setting up Apache, MySQL, SSL, and DNS for secure, reliable hosting.
- Optimized static assets and frontend theming to improve page-load performance, and handled ongoing server monitoring and maintenance for high availability.

LEADERSHIP & EXPERIENCE

Design Team Lead

2025

Dhruva Club, VIT-AP University

- Led a cross-functional design team delivering branding and promotional campaigns for club events, coordinating with multiple stakeholders to maintain a consistent visual identity under tight timelines.

Technical Team Member

Computer Society of India (CSI), VIT-AP

- Supported organization of technical workshops and coding events, coordinating logistics and technical execution with a student team.

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) 2025 – Certified DevOps Professional
- Oracle Cloud Infrastructure (OCI) 2025 – Certified Foundations Associate
- Adobe UI & UX (Graphic Design) Certificate
- E-Cell IIT Roorkee – Android Development
- VIT-AP SCOPE – 5-Day DevOps Workshop
